Laim is a lightweight and handy free online dictionary, which helps you find what you need on the web quickly and effectively. Laim will instantly learn the meanings of all words or phrases you type and continue to update its database with the latest available dictionary. You can also get a Chinese/English (including French, German, Spanish and more) online dictionary as your desktop dictionary, right from the start. Once you download the app, it will automatically sync your dictionary to your desktop. Unlike other online dictionary apps, all of the input field here are designed to really help you type fast and easily. There is a grammar button (built in) to fix the spelling of your words before you type. As for the Scrabble style input, Laim will auto recognize what the English word you typed is. Tricks and tips: 1. When you search for a specific word, you can double-click the top entry on the list to open it. There are many results on the web for the same keyword, so you can find a quicker result. 2. Because the app records how you type, you can swipe across sentences to highlight specific words in the dictionary and you can even select multiple words at a time. 3. You don't need to worry about wrongly entered characters as Laim will also delete any words you typed that are irrelevant to the word you are trying to find. If you want to get a lot more out of Laim, you can still find many other tools under the Help menu. The combination of Laim and LaimSpell and LaimPro will give you an outstanding dictionary you will want to use everyday. Enjoy!! \* You can download the free trial version from Apple's App Store or Google Play. #### What's New in the LaimCalc?

LaimCalc is an agile full-featured scientific calculator. Its high-quality design and rich feature set allow users to quickly and effectively perform calculations. Want to calculate a square root? Maybe even square and cube roots? How about solving polynomial equations? LaimCalc can do all of that and more. Additional features include: - a convenient and user-friendly user interface - a very fast and efficient performance - support for fractions, fractions with decimals, decimals and negative numbers - automatic units conversion - an extremely accurate display resolution - support for Spanish, French, Italian, German, and English languages - support for encryption - very precise working in graphics modes - full support for custom functions, input and output files - the ability to customize key assignment If you take into account that its program size is just over 40 Mb, LaimCalc is a great addition to any computer running Windows. You can download LaimCalc for free from the developer's page: 10/10 Very easy to use, nice user interface 09/09 Great app, but could do with more options 10/10 I really love this app. I just wish it had a feature where you could see a list of what's already set and the settings that are saved automatically. I would really like to see a settings manager to edit what's been set in the past, or create a "My Favorites" and store them there. 09/09 It took me a while to figure it out, but once you use a mouse with LaimCalc it's a breeze to use. I'm very happy with the calculator I got. It's a great program. 10/10 LaimCalc is an excellent app! It does a lot more than traditional calculators because of Java (I also have the same app for Java.) I use a toolset that uses Java to perform many interesting 'tricks' in my software. It's also very nice to use for common computations as well. The interface is very slick and very easy to use. Nice job LaimCalc! 09/09 5/5 If a few steps are a little confusing for you, this is a great calculator. And the price is right.
